JOB LISTING:
Our TCDIP summer clerkship program will focus on research and writing, which includes conducting legal research, preparing legal memoranda, proofreading, and verifying fact and legal citations. You will also work one-on-one with partners and associates to discover the workings of intellectual property litigation and become a more creative and strategic thinker. The program is designed to give you an experience very similar to that of a first-year associate. In addition to your time at Carlson Caspers, you will also be clerking for half the summer with our TCDIP corporate partner Abbott Laboratories, participating in work on intellectual property issues pertinent to a corporate law department in a high-technology field.

Interested students should email a cover letter, resume and college transcripts to Renee Iwen at riwen@carlsoncaspers.com. Applications will be accepted on a rolling basis.

WHO WE ARE:
Carlson Caspers is a leading intellectual property law firm based in Minneapolis, MN. The firm receives accolades by numerous intellectual property rating organizations and publications. The firm’s specialties include intellectual property litigation and counseling, patent infringement, trade secrets, copyrights, trademarks, trade dress, data privacy, Hatch-Waxman, monetization, IPRs, appeals, and more. The experienced lawyers at Carlson Caspers are scientists, pharmacists, engineers, and technologists who are excellent communicators who focus on delivering value by listening to the client’s problems and providing practical solutions. Individually and as a team, they bring in-depth industry knowledge, technical experience, subject matter expertise, and a global business perspective to every legal challenge.

Abbott is a global healthcare leader that is committed to helping people live their best possible life through the power of health. For more than 125 years, we've brought new products and technologies to the world -- in nutrition, diagnostics, medical devices and branded generic pharmaceuticals -- that create more possibilities for more people at all stages of life. Today, 99,000 of us are working to help people live not just longer, but better, in the more than 150 countries we serve.
